

UID BASE STATION

The UID Base Station is a high powered industrial reader that works with all UID Supplied microchips. Read distances of 5-9" can be expected and comes with an integrated internal antenna as well as a 6' attachable antenna wand. This allows the reader to be used as a desktop reader as well as a reader with an attachable wand antenna. Additional antennas such as in a table or cage can also be attached to this reader. The rugged aluminum housing affords increased durability and can be sprayed and wiped down with cleaning agents without damage.

- Multiple antenna configurations for LF, HF, or Both
- Attachable Antenna wand
- Increased read range
- AC Powered
- USB/Serial communication
