

## HANDHELD RFID READER

The URH 1L Handheld Reader is a handheld medium range LF frequency reader that can connect either USB or Bluetooth to a computer system. Perfect for general laboratory use where mobility is needed.

The URH 1L reader can be used in continuous read mode or activated by the press of a button on the reader. Communication to your software system is seamless and it can even act as a keyboard input.

- USB or Bluetooth connectivity
- Medium Read range (5cm with the UC-2112 Transponder)
- Compatible with All UID Injectable Chips
- Li-Ion Battery for 4+ hours of continuous run time. Intermittent mode (10 scans/hr) approximately 5 days of battery life.
- AC option for continuous power
- 134.2 kHz

Product #	Description	Qty	Price
URH 1L	Handheld RFID Reader	1	\$885.00

## HANDHELD READER CASE

Add protection to your URH 1 reader with a silicone rubber case. The silicon case provides better grip and will help protect the reader from accidental drops.

Four colors available – Black, Red, Blue, and Orange.

*(Reader Not Included)*
